12 exhibitors from 4 nations

18 presentations in English

ADL-conference 2009
Training, Simulation and Education

"A vital part of the concept of Integrated Logistics, as I see it, is the standardization of technical documentation; others are education, training and further education. And I see ADL as an important bridge between availability of standardized technical documentation and the means to conduct education and training"

"We are moving away from need to know to need to share. This is a Challenge"

"I see ADL as an important operational support function, especially when it comes to tackling rapidly emerging training requirements during operations"

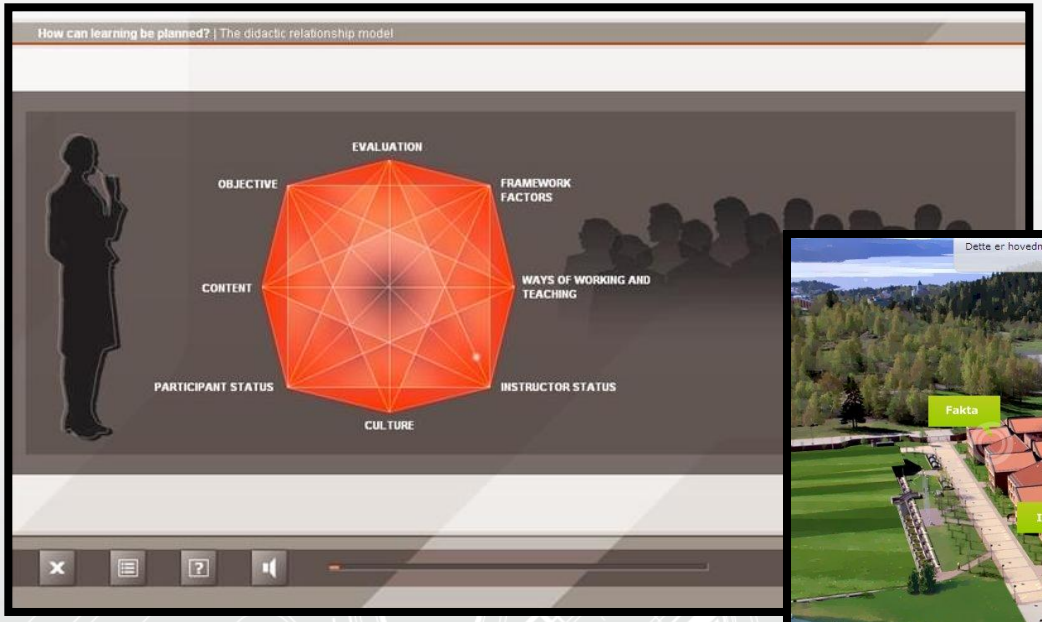
Major General Roar Sundseth

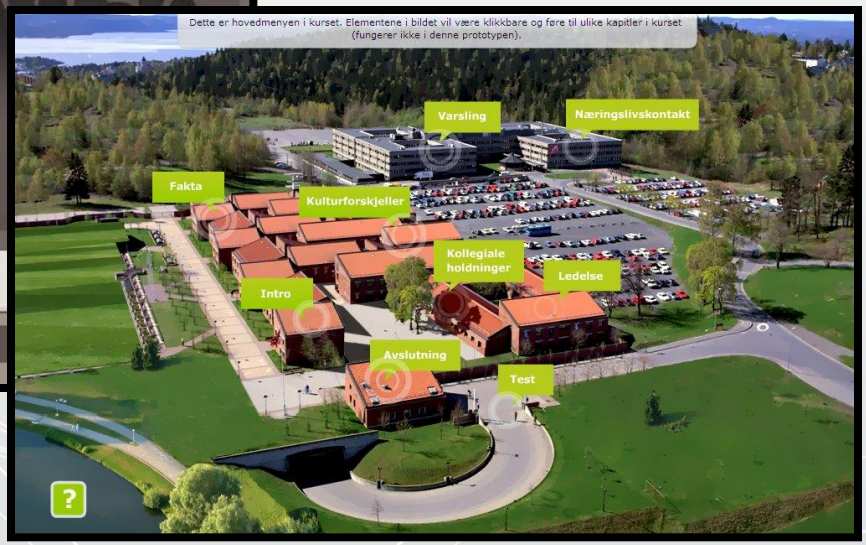
CO NoD, Department for Innovation, Network Capabilities and Information Infrastructure (INI)

Internet LMS Capability

- Plan to implement IBM VLC on Internet , 2009-2013
- To reach Forces in INTOPS, National Guard, Civilians
- Important part in the education any time , any were
- New LMS from 2013, IBM support stops
- Key part in several projects

Sharing of courses





Web based modules – Staff College

- About 60% of the basic module is to be Web based
- Use of recording classroom at the Staff College
- Use of simulators and e-learning courses
- Web teachers located at the Staff College
- Papers delivered and assessed in the Internet LMS
- Students from all over Norway
- Development started – implemented step by step in 2009

Gaming

- NoD project P5000
- ACT have acquired a NATO license on VBS II
- Implementation of gaming classrooms
- Norway to follow with local and national gaming network

Repositories – M-FASR

- NoD needs a Defence repository
- Increase the reuse on both SCO and object level
- Search, find/preview, retrieve and reuse
- Still in the R&D phase
- Exiting projects with ADL partners (US, Canada)

Nordic ADL unit

- Planning since late 2008
- Recommendations ready August 2009
  - Finland, Norway and Sweden
  - Main office located in Oslo
  - 3 local ADL offices in each nation
- Decision by the 3 nations in September 2009
- Could be the Nordic ADL Partnership lab

Areas of interest 2010 - 2011

- Increase the in-house development skills and capability
- Look at Virtual worlds
- Learning vs Techpub
- Harmonize standards nationally and internationally
- Further improve e-learning course quality

Thank you
